FOR IMMEDIATE RELEASE

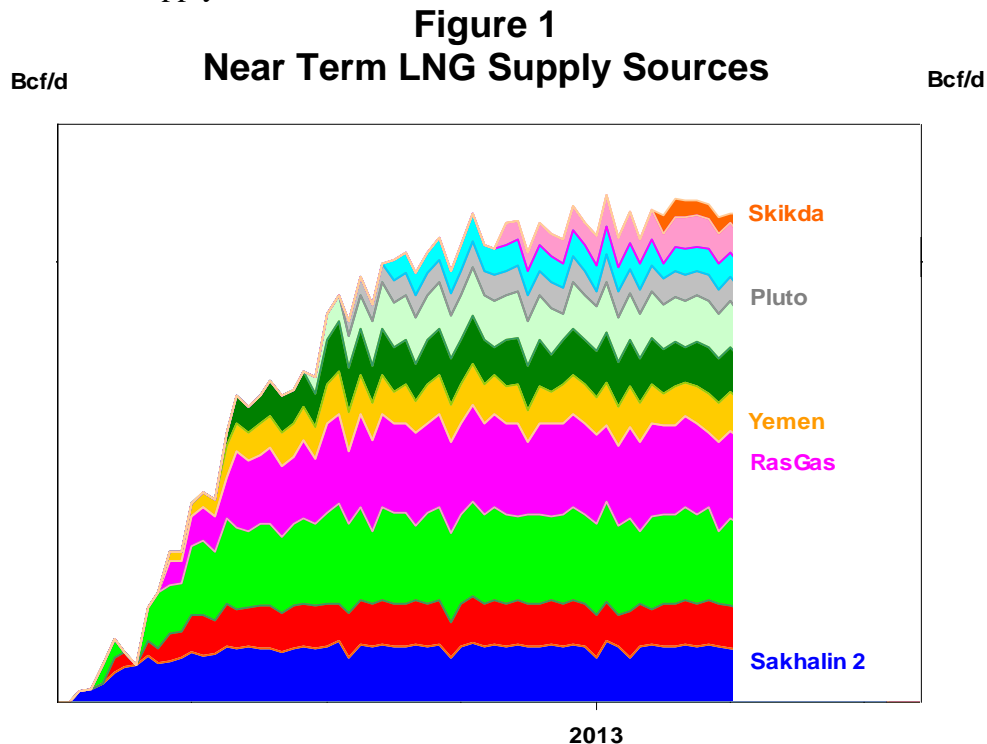

Calgary, January 6, 2010

Factors Impacting LNG Imports

Ziff Energy announces the release of a report which examines global LNG supply availability for North America to 2020.

As global gas demand recovers and new liquefaction projects are delayed, Ziff Energy expects a potential shortfall in LNG supply commencing in 2014, which will put upward pressure on global gas prices. Emerging LNG import markets put further pressure on global LNG supply when new regasification terminals commence operations by the 2013 timeframe. Potential LNG supply is expected exceed 50 Bcf/d by 2020, with over 10 Bcf/d of LNG supply added by 2014 from a dozen projects.

Figure 1 provides new LNG supply sources.
